Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach the combination of limitations in the independent claims 18, 30, and 36, especially, "calculating a sorting sequence of fact numbers, said fact numbers identifying the data records;

calculating entry points for each dimension of the n-dimensional matrix presentation, each calculated entry point calculated to be linked with a corresponding fact number of the sorting sequence;

calculating a cardinality of the n-dimensional matrix presentation in dependence on the calculated sorting sequence and the calculated corresponding entry points;

and generating the n-dimensional matrix presentation based on the calculated cardinality and the calculated entry points."

Johnson et al. (US 6334125) teaches method and apparatus for loading data into a cube forest data structure – the title; multi-dimensional database – col. 7, lines 49-64; cardinalities and sorting the tuple list for the updated subtrees – col. 21. Johnson et al. do not teach the combination of limitations taught above.

2. Dependent claims 19-29, 31-35, and 37-41 incorporate the listed limitations by reference and contain limitations that further distinguish over the art of record. For these reasons, claims 19-29, 31-35, and 37-41 are considered allowable over the art of record.
